

Lab 3 test results: Issue 1 (Testing UI Consistency)

Tester: Christine Joy Alentajan

Date: 2026-10-04

Branch: feature/1-matching_register_to_login

Environment: local XAMPP, Chrome & Firefox.

Run 1 — Original implementation

#	Test case	Expected result	Result
1	Check top of register.php	Tab menu is removed	Pass
2	Check for new link	"Already have an account? Log In" is present	Pass
3	Click the new link	Redirects to login.php	Pass
4	Fill and submit form (Wizard steps 1-4)	Registration succeeds without errors	Pass
5	Visual check against login.php	Link style matches login page	Pass

Run 2 — Re-test after corrective commit 4041e1d

#	Test case	Expected result	Result
R1	Visual check of new link	Link matches login.php styling (font, color, margin)	Pass
R2	Click the new link	Redirects to login.php correctly	Pass
R3	Fill and submit form (Wizard steps 1-4)	Registration succeeds; no UI breakage	Pass
R4	Check mobile view	Wizard steps and link are properly aligned on mobile	Pass
R5	Confirm tabs are gone	No tab navigation menu remains	Pass

Manual tests on a local database; no automated tests.

Browsers tested: Google Chrome and Mozilla Firefox only.

The backend registration logic (includes/register_functions.php) was not modified and was not re-tested as part of this change.

The login.php page was not modified; the fix only brought register.php into alignment with it.
